

Rockford Police Department

Record Management System (NetRMS)

Beginning January 1, 2006, the Rockford Police Department implemented a new police report writing and records management system called NetRMS. NetRMS incorporates NIBRS (National Incident-Based Reporting System) reporting which collects comprehensive data about a crime incident. NIBRS reporting replaces the traditional Summary UCR (Uniform Crime Reporting) that has been in place in the country since 1930.

UCR summaries report the total number of incidents and arrests made for only eight offenses, commonly known as Part I offenses. Arrests only for certain drug related incidents are also reported. Under UCR, the most severe offense in an incident is reported and all lesser offenses go unreported when no arrest is made.

NIBRS collects data on 46 specific crimes known as Group A offenses and 11 additional Group B offenses. NIBRS also captures **all** offenses completed in a particular incident as well as characteristics of both victims and perpetrators. NIBRS can produce a more detailed, accurate and meaningful account of what happened in an incident. The Rockford Police Department will not only be able to give accurate counts of offenses and clearances that occur, we will also be able to identify common crime problems and trends through analysis of the data.

For example, if a Forced Entry Residential Burglary occurred, an offense of Criminal Damage to Property would be reported in addition to the Burglary. Other information such as the type of tools that were used to gain access, what was damaged and the type of security are also reported.

On December 7, 2006 the Rockford Police Department achieved NIBRS Certification by the FBI. The Rockford Police Department is the first agency in the state of Illinois to adopt NIBRS reporting and is only the third in the nation who reports their crime statistics directly to the FBI.

In February 2007, the Rockford Police Department will begin to publish statistics referencing the new NIBRS offense categories.

It should be noted that a single incident can contain many offenses. Statistics will be gathered for every offense that has occurred in an incident. If an incident is cleared by an arrest, all offenses within that incident are also cleared.

Fig. 1 is an example of a traditional Summary UCR report that the Rockford Police Department sends to the Illinois State Police every month. It highlights the more severe Group 1 offenses and related arrests that occurred in Rockford. This report will no longer be published.

Total Number of Incidents this period:	17,517
Total Number of People Arrested this period:	6,929

In NIBRS reporting, up to 10 of the most serious offenses can be reported per incident. Each code will be reported once even though there may be more than one victim per offense. The clearance of an incident by an arrest or exceptional means clears all offenses within that incident.

In conclusion, reporting NIBRS will provide the Rockford Police Department with a clear picture of the crime that is happening in our city. The data captured in a typical police report when analyzed with other available databases such as parolee, gang members or sex offenders can identify trends and problem areas and help lower crime in Rockford.

^{*} Service Calls include traffic offenses, information for Police, medical assist, service to other agencies, etc.
